

REMARKS

Applicants elect with traverse Group I, directed to pharmaceutical compositions. As a species applicants elect with traverse 5,10-methylene-(6R)-tetrahydrofolic acid. The traversal is on the grounds that the patent office has not established that it would pose an undue burden to examine the full scope of the claimed invention.

The Commissioner is hereby authorized to charge any fees associated with this response or credit any overpayment to Deposit Account No. 13-3402.

Respectfully submitted,
